

SPACE COOPERATION

Juno Mission

**Agreement Between the
UNITED STATES OF AMERICA
and ITALY**

Effected by Exchange of Notes at
Washington June 29 and August 3, 2011

with

Memorandum of Understanding

NOTE BY THE DEPARTMENT OF STATE

Pursuant to Public Law 89—497, approved July 8, 1966
(80 Stat. 271; 1 U.S.C. 113)—

“ . . . the Treaties and Other International Acts Series issued under the authority of the Secretary of State shall be competent evidence . . . of the treaties, international agreements other than treaties, and proclamations by the President of such treaties and international agreements other than treaties, as the case may be, therein contained, in all the courts of law and equity and of maritime jurisdiction, and in all the tribunals and public offices of the United States, and of the several States, without any further proof or authentication thereof.”

ITALY

Space Cooperation: Juno Mission

*Agreement effected by exchange of notes at
Washington June 29 and August 3, 2011;
Entered into force August 3, 2011.
With memorandum of understanding.*

DEPARTMENT OF STATE

WASHINGTON

June 29, 2011

Excellency:

I have the honor to refer to the recent discussions between representatives of the Government of the United States of America and the Government of the Italian Republic concerning the terms and conditions whereby the National Aeronautics and Space Administration (NASA) and the Italian Space Agency (ASI) will undertake cooperation on the Juno Mission to Jupiter.

On behalf of the Government of the United States of America, I propose that cooperation between the two Governments on this project shall be in accordance with the terms and conditions set forth in the enclosed Memorandum of Understanding, signed on June 22, 2011, between NASA and ASI, and the enclosed Juno Appendix.

His Excellency

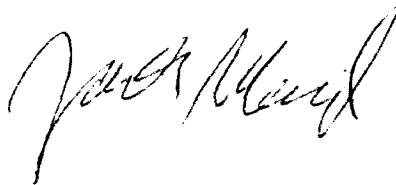

Giulio Terzi di Sant'Agata,
Ambassador of Italy.

DIPLOMATIC NOTE

If the foregoing proposal is acceptable to the Government of the Italian Republic, I further propose that this note, including the enclosed Memorandum of Understanding, and your affirmative reply shall constitute an agreement between the two Governments which shall enter into force on the date of your reply and shall remain in force until the expiration or termination of the Memorandum of Understanding, in accordance with the terms thereof.

Accept, Excellency, the renewed assurances of my highest consideration.

For the Secretary of State:

A handwritten signature in black ink, appearing to read "Jack Marshall", written in a cursive style.

Enclosure:

As stated.

MEMORANDUM OF UNDERSTANDING

BETWEEN THE

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
OF THE UNITED STATES OF AMERICA**

AND THE

ITALIAN SPACE AGENCY

CONCERNING THE

JUNO MISSION

PREAMBLE

The National Aeronautics and Space Administration of the United States of America (hereinafter referred to as “NASA”), and

The Italian Space Agency (hereinafter referred to as “ASI”),

Collectively hereinafter referred to as “the Parties”:

CONSIDERING that NASA is developing the Juno mission as part of its New Frontiers program;

RECALLING that the Juno mission was selected in May 2005 under a New Frontiers Program Announcement of Opportunity (AO-03-OSS-03);

CONSIDERING that two Italian scientific payloads, named the Jovian Infrared Auroral Mapper (JIRAM) and Ka-Band Transponder (KaT), are part of the Juno mission;

CONSIDERING that NASA and ASI have a long history of cooperation in the exploration of the solar system;

RECALLING the interim agreement of March 21, 2008, between NASA and ASI for the early phases of cooperation on the Juno mission;

HAVE AGREED as follows:

ARTICLE 1 – SCOPE

- 1.1 This Memorandum of Understanding (MOU) defines the responsibilities, as well as the terms and conditions, by which the cooperation between the Parties shall be conducted within the framework of NASA’s Juno mission.
- 1.2 The primary activities addressed in this MOU concern scientific cooperation through the provision by ASI of the Italian JIRAM and KaT instruments for NASA’s Juno mission.

ARTICLE 2 – THE JUNO MISSION

- 2.1 NASA’s Juno mission consists of a spacecraft carrying a scientific payload designed to further our understanding of planetary and solar system formation by studying the origin and evolution of Jupiter. Juno is intended to probe Jupiter’s interior structure, atmospheric composition and dynamics, and polar magnetosphere. Using a spinning, solar-powered spacecraft, Juno is designed to make global maps of the gravity, magnetic fields, and atmospheric composition of Jupiter from a unique polar orbit with a close perijove. Juno will carry precise, high-sensitivity radiometers, magnetometers, and gravity science systems, and its planned 30 science orbits will extensively sample Jupiter’s full range of latitudes and longitudes. From its polar perspective, Juno will also

combine in situ and remote sensing observations to explore the polar magnetosphere and determine what drives Jupiter's remarkable auroras.

- 2.2 Juno is planned for launch no earlier than August 2011 on a U.S. Atlas 5 expendable launch vehicle from the U.S. Cape Canaveral Air Station in Florida. The spacecraft is expected to arrive at Jupiter in July 2016.
- 2.3 NASA has picked U.S. Principal Investigator (PI), Dr. Scott Bolton, of the Southwest Research Institute in San Antonio, Texas, to lead an international team to develop the Juno instruments and to carry out the scientific investigations. The international Juno team includes participants from the United States, Italy, France, and Belgium.

ARTICLE 3 – PROGRAMMATIC RESPONSIBILITIES OF NASA

NASA shall use reasonable efforts to carry out the following responsibilities:

- 3.1 Manage and conduct the Juno project throughout the life of the mission, including development, integration, test, launch, and operations activities during the cruise and science phases of the Juno mission.
- 3.2 Lead the Juno Science Operations Center development and operations activities.
- 3.3 Consistent with the Committee on Space Research (COSPAR) planetary protection policy and NASA directives, define material and biological contamination constraints for the Juno mission, and ensure that the integrated payload meets planetary contamination constraints.

In support of the JIRAM:

- 3.4 Support the development of the ASI-provided JIRAM instrument as outlined in Appendix A – “Jet Propulsion Laboratory (JPL) Document D-37646, Roles and Responsibilities – JIRAM and KaT Development.”
- 3.5 Provide opportunities for Italian participation in the Juno atmosphere and magnetosphere science working group(s), part of the Juno science team.

In support of the KaT:

- 3.6 Provide overall program management for the Telecom Subsystem (including the KaT).
- 3.7 Establish and maintain the Juno mission design for the gravity science investigation, including requirements definition, development of the KaT specification, subsystem level verification plans, and overall mission requirements.
- 3.8 Support the development of the ASI-provided KaT as outlined in Appendix A – “JPL Document D-37646, Roles and Responsibilities – JIRAM and KaT Development.”

- 3.9 Provide opportunities for Italian participation in the Juno interior science working group(s), part of the Juno science team.

ARTICLE 4 – PROGRAMMATIC RESPONSIBILITIES OF ASI

ASI shall use reasonable efforts to carry out the following responsibilities:

- 4.1 Design and provide to NASA for flight on the Juno mission, in close coordination with the Juno PI regarding material composition, a small aluminum plaque honoring Galileo Galilei, with final approval subject to NASA's acceptance and assurance procedures;

In support of the JIRAM:

- 4.2 Design, develop, test, calibrate, and deliver the JIRAM instrument to NASA within a mutually agreed-upon schedule to meet the Juno launch readiness date and support its operations throughout the cruise and science phases of the mission.
- 4.3 Complete specific detailed duties and tasks as outlined in Appendix A – “JPL Document D-37646, Roles and Responsibilities – JIRAM and KaT Development.”
- 4.4 Participate in the Juno atmosphere and magnetosphere science working group(s).
- 4.5 Provide high- and low-level data products consistent with the Juno science team data analysis and archiving plan through the ASI Science Data Center.

In support of the KaT:

- 4.6 Design, develop, test, calibrate, and deliver the KaT to NASA for integration into the Juno mission telecommunications subsystem within a mutually agreed schedule to meet the Juno launch readiness date.
- 4.7 Complete specific detailed duties and tasks as outlined in Appendix A – “JPL Document D-37646, Roles and Responsibilities – JIRAM and KaT Development.”
- 4.8 Support KaT operations throughout the cruise and science phases of the mission.
- 4.9 Participate in the Juno interior science working group.
- 4.10 Provide high- and low-level data products consistent with the Juno science team data analysis and archiving plan through the ASI Science Data Center.

ARTICLE 5 – FINANCIAL ARRANGEMENTS

- 5.1 NASA and ASI shall each bear the costs of discharging their respective responsibilities, including travel and subsistence of personnel and transportation of all equipment and other items for which it is responsible. Further, the obligations of NASA and ASI under this MOU are subject to the availability of appropriated funds. Should either Party encounter budgetary problems in the course of its respective internal procedures which may affect the activities to be carried out under this MOU, the Party encountering the problems shall notify and consult with the other Party as soon as possible in order to minimize the negative impact of such problems in the cooperation.

ARTICLE 6 – MANAGEMENT/POINTS OF CONTACT

- 6.1 NASA's Planetary Science Director, within the Science Mission Directorate, is responsible for overseeing NASA's New Frontiers Program, is supported by mission-specific program executives, and is responsible for oversight of all NASA planetary science program activities, as well as formal programmatic liaison with ASI and liaison and coordination with other U.S. Government agencies.
- 6.2 NASA's Juno Program Executive is responsible for the definition, integration, and assessment of all activities related to the Juno mission. The Juno Program Executive is also the principal point of contact for NASA in the performance of this MOU.
- 6.3 The PI is the primary point of contact for international discussions of Juno mission science goals, objectives, and policies.
- 6.4 NASA has designated JPL to lead the formulation and implementation of the Juno mission. A Juno Project Office has been established for this purpose, and a Juno Project Manager has been assigned. This Project Office is part of the New Frontiers Program Office, located at NASA's Marshall Space Flight Center.
- 6.5 For ASI, the Head of Exploration and Observation of the Universe Unit is responsible for overall programmatic management of the Italian-sponsored Juno contributions. The Head of Exploration and Observation of the Universe Unit is also the principal point of contact for ASI in the performance of this MOU. An ASI Juno Project Office has been established for the realization of the instruments, and an ASI Juno Project Manager has been appointed.
- 6.6 The ASI Principal Investigators of JIRAM and KaT are the primary points of contact for the science goals and data analysis.
- 6.7 Each Party will provide, on occasion and as mutually agreed upon, for its representatives to visit the other's facilities to participate in integration and testing and to observe, confer with, and advise the other Party in regard to aspects of design and development of compatible hardware interfaces, integration, and testing, as well as any activities required to ensure safe, reliable operations of the hardware as part of the overall Juno system.

ARTICLE 7 – LIABILITY AND RISK OF LOSS

- 7.1 The objective of this Article is to establish a cross-waiver of liability in the interest of encouraging participation in the exploration, exploitation, and use of outer space. The Parties intend that the cross-waiver of liability be broadly construed to achieve this objective.
- 7.2 For purposes of this Article:
- (a) The term “Damage” means:
 - (i) Bodily injury to, or other impairment of health of, or death of, any person;
 - (ii) Damage to, loss of, or loss of use of any property;
 - (iii) Loss of revenue or profits; or
 - (iv) Other direct, indirect, or consequential Damage.
 - (b) The term “Launch Vehicle” means an object, or any part thereof, intended for launch, launched from Earth, or returning to Earth which carries Payloads, persons, or both.
 - (c) The term “Payload” means all property to be flown or used on or in a Launch Vehicle.
 - (d) The term “Protected Space Operations” means all Launch Vehicle activities and Payload activities on Earth, in outer space, or in transit between Earth and outer space in implementation of an agreement for launch services. Protected Space Operations begins at the signature of this MOU and ends when all activities done in implementation of this MOU are completed. It includes, but is not limited to:
 - (i) Research, design, development, test, manufacture, assembly, integration, operation, or use of Launch Vehicles, Payloads, or instruments, as well as related support equipment and facilities and services; and
 - (ii) All activities related to ground support, test, training, simulation, or guidance and control equipment and related facilities or services.

“Protected Space Operations” excludes activities on Earth that are conducted on return from space to develop further a Payload’s product or process for use other than for the activities within the scope of an agreement for launch services.
 - (e) The term “Related Entity” means:
 - (i) A contractor or subcontractor of a Party at any tier;

- (ii) A user or customer of a Party at any tier; or
- (iii) A contractor or subcontractor of a user or customer of a Party at any tier.

The terms “contractor” and “subcontractor” include suppliers of any kind. The term “Related Entity” may also apply to a State, or an agency or institution of a State, having the same relationship to a Party as described in paragraphs 2(e)(i) through 2(e)(iii) of this Article, or otherwise engaged in the implementation of Protected Space Operations as defined in paragraph 2(d) of this Article.

7.3 Cross-waiver of liability:

- (a) Each Party agrees to a cross-waiver of liability pursuant to which each Party waives all claims against any of the entities or persons listed in paragraphs 3(a)(i) through 3(a)(iii) of this Article based on Damage arising out of Protected Space Operations. This cross-waiver shall apply only if the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations. The cross-waiver shall apply to any claims for Damage, whatever the legal basis for such claims, against:
 - (i) The other Party;
 - (ii) A Related Entity of any entity identified in paragraph 3(a)(i) of this Article; or
 - (iii) The employees of any of the entities identified in paragraphs 3(a)(i) through 3(a)(ii) of this Article.
- (b) In addition, each Party shall extend the cross-waiver of liability, as set forth in paragraph 3(a) of this Article, to its own Related Entities by requiring them, by contract or otherwise, to:
 - (i) Waive all claims against the entities or persons identified in paragraphs 3(a)(i) through 3(a)(iii) of this Article; and
 - (ii) Require that their Related Entities waive all claims against the entities or persons identified in paragraphs 3(a)(i) through 3(a)(iii) of this Article.
- (c) For avoidance of doubt, this cross-waiver of liability includes a cross-waiver of claims arising from the Convention on International Liability for Damage Caused by Space Objects, done on March 29, 1972, where the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations.

- (d) Notwithstanding the other provisions of this Article, this cross-waiver of liability shall not be applicable to:
 - (i) Claims between a Party and its own Related Entity or between its own Related Entities;
 - (ii) Claims made by a natural person, his/her estate, survivors, or subrogees (except when a subrogee is a Party to this MOU or is otherwise bound by the terms of this cross-waiver) for bodily injury to, or other impairment of health of, or death of, such person;
 - (iii) Claims for Damage caused by willful misconduct;
 - (iv) Intellectual property claims;
 - (v) Claims for Damage resulting from a failure of a Party to extend the cross-waiver of liability to its Related Entities, pursuant to paragraph 3(b) of this Article; or
 - (vi) Claims by a Party arising out of or relating to another Party's failure to perform its obligations under this MOU;
- (e) Nothing in this Article shall be construed to create the basis for a claim or suit where none would otherwise exist.
- (f) In the event of third-Party claims for which the Parties may be liable, the Parties shall consult promptly to determine an appropriate and equitable apportionment of any potential liability and on the defense of any such claims.
- (g) Except as otherwise provided in 7.3(c), nothing in this MOU shall affect liability, if any, pursuant to the Convention on International Liability for Damage Caused by Space Objects (Liability Convention), done on March 29, 1972. In the event of a claim arising out of the Liability Convention, the Parties shall request that their respective Governments consult promptly on any potential liability, on any apportionment of such liability, and on the defense of such claim.

ARTICLE 8 - REGISTRATION OF SPACE OBJECTS

- 8.1 NASA shall request that its Government register Juno as a space object in accordance with the Convention on the Registration of Objects Launched into Outer Space, done on November 12, 1974 (the Registration Convention). However, exercise of jurisdiction and control of Juno shall be subject to the relevant provisions of this MOU. Registration pursuant to this Article shall not affect the rights or obligations of the Parties under the Liability Convention.

ARTICLE 9 -TRANSFER OF GOODS AND TECHNICAL DATA

The Parties are obligated to transfer only those technical data (including software) and goods necessary to fulfill their respective responsibilities under this MOU, in accordance with the following provisions, notwithstanding any other provisions of this MOU:

- 9.1 All activities under this MOU shall be carried out in accordance with the Parties' national laws and regulations, including those laws and regulations pertaining to export control and the control of classified information.
- 9.2 The transfer of technical data for the purpose of discharging the Parties' responsibilities with regard to interface, integration, and safety shall normally be made without restriction, except as required by paragraph 1 of this Article.
- 9.3 All transfers of goods and proprietary or export-controlled technical data are subject to the following provisions.
 - (a) In the event a Party or its Related Entity (defined for the purpose of this Article as contractors, subcontractors, grantees, or cooperating entities, or any lower tier contractor, subcontractor, grantee, or cooperating entities of a Party) finds it necessary to transfer such goods or data, for which protection is to be maintained, such goods shall be specifically identified and such data shall be marked.
 - (b) The identification for such goods and the marking on such data shall indicate that the goods and data shall be used by the receiving Party and its Related Entities only for the purposes of fulfilling the receiving Party's or Related Entities' responsibilities under this MOU, and that such goods and data shall not be disclosed or retransferred to any other entity without the prior written permission of the furnishing Party or its Related Entity.
 - (c) The receiving Party or Related Entity shall abide by the terms of the notice and protect any such goods and data from unauthorized use and disclosure.
 - (d) The Parties to this MOU shall cause their Related Entities to be bound by the provisions of this Article through contractual mechanisms or equivalent measures.
- 9.4 All goods exchanged in the performance of this MOU shall be used by the receiving Party or Related Entity exclusively for the purposes of the MOU. Upon completion of the activities under this MOU, the receiving Party or Related Entity shall return or otherwise dispose of all goods and marked proprietary or export-controlled technical data provided under this MOU, as directed by the furnishing Party or Related Entity.

ARTICLE 10 - INTELLECTUAL PROPERTY RIGHTS

- 10.1 Nothing in this MOU shall be construed as granting, either expressly or by implication, to the other Party any rights to, or interest in, any inventions or works of a Party or its Related Entities made prior to the entry into force of, or outside the scope of, this MOU, including any patents (or similar forms of protection in any country) corresponding to such inventions or any copyrights corresponding to such works.
- 10.2 Any rights to, or interest in, any invention or work made in the performance of this MOU solely by one Party or any of its Related Entities, including any patents (or similar forms of protection in any country) corresponding to such invention or any copyright corresponding to such work, shall be owned by such Party or Related Entity. Allocation of rights to, or interest in, such invention or work between such Party and its Related Entities shall be determined by applicable laws, rules, regulations, and contractual obligations.
- 10.3 It is not anticipated that there will be any joint inventions made in the performance of this MOU. Nevertheless, in the event that an invention is jointly made by the Parties in the performance of this MOU, the Parties shall, in good faith, consult and agree within 30 calendar days as to:
- (a) the allocation of rights to, or interest in, such joint invention, including any patents (or similar forms of protection in any country) corresponding to such joint invention;
 - (b) the responsibilities, costs, and actions to be taken to establish and maintain patents (or similar forms of protection in any country) for each such joint invention; and
 - (c) the terms and conditions of any license or other rights to be exchanged between the Parties or granted by one Party to the other Party.
- 10.4 For any work jointly authored by the Parties, should the Parties decide to register the copyright in such work, they shall, in good faith, consult and agree as to the responsibilities, costs, and actions to be taken to register copyrights and maintain copyright protection (in any country).
- 10.5 Subject to the provisions of Article 9, Transfer of Goods and Technical Data, and Article 11, Release of Results and Public Information, each Party shall have an irrevocable royalty-free right to reproduce, prepare derivative works, distribute, and present publicly, and authorize others to do so on its behalf, any copyrighted work resulting from activities undertaken in the performance of this MOU for its own purposes, regardless of whether the work was created solely by, or on behalf of, the other Party or jointly with the other Party.

ARTICLE 11 - RELEASE OF RESULTS AND PUBLIC INFORMATION

- 11.1 The Parties retain the right to release public information regarding their own activities under this MOU. The Parties shall coordinate with each other in advance concerning releasing to the public information that relates to the other Party's responsibilities or performance under this MOU. Full acknowledgement shall be made by both Parties of the role of the other Party in the Juno mission, including the commemoration of Galileo Galilei through the aluminum plaque provided by ASI as referred to in Article 4.1 above.
- 11.2 The Parties shall make the final results obtained from the Juno mission available to the general scientific community through publication in appropriate journals or by presentations at scientific conferences as soon as possible and in a manner consistent with good scientific practices.
- 11.3 The Parties acknowledge that the following data or information does not constitute public information and that such data or information shall not be included in any publication or presentation by a Party under this Article without the other Party's prior written permission:
 - (a) data furnished by the other Party in accordance with Article 9. Transfer of Goods and Technical Data, of this MOU which is export-controlled, classified, or proprietary; or
 - (b) information about an invention of the other Party before an application for a patent (or similar form of protection in any country) corresponding to such invention has been filed covering the same, or a decision not to file has been made.

ARTICLE 12 - SHARING AND DISTRIBUTION OF SCIENTIFIC DATA

- 12.1 All release of Juno data by the Juno investigation teams, including the JIRAM and KaT science teams, shall comply with the policies for release of data and public information as stated in the NASA New Frontiers Program Data Management Plan and in the Juno Project Data Management Plan (PDMP), which will be approved by NASA. All scientific and ancillary Juno data records, including JIRAM and KaT data, shall be submitted to NASA's Planetary Data System (PDS) in accordance with PDS standards and policies on suitable data levels on the schedule in the Juno PDMP, but not to exceed the six-month period defined in paragraph 2 of this Article.
- 12.2 Science data obtained by the JIRAM and KaT co-investigators shall be delivered to the Juno Science Operations Center (JSOC) in a timely manner as they are created for use by the Juno Science Team. Release of Juno science and ancillary data to the scientific community is accomplished when the products are delivered to the PDS. The archiving schedule in the PDMP shall not exceed six months for the Juno Science Investigation Teams to process, calibrate, and validate the data prior to delivery to the PDS. This validation period begins

with the receipt by the Juno investigators of usable science data, ground-based and flight calibration data, and any associated Juno data in a form suitable for analysis.

- 12.3 Data to be submitted to the JSOC and archived with the PDS include edited telemetry data (Committee on Data Management and Archive (CODMAC) Level 2 data), full resolution calibrated data (CODMAC Level 3), calibration documentation, and higher level products such as maps.
- 12.4 The Parties shall have the right to use the data (processed and unprocessed) at any time for support of their respective responsibilities to the mission.
- 12.5 The Parties and their investigators at any level, including co-investigators, collaborators, and other associated scientists, shall have full and immediate access to scientific data obtained by the Juno Project. The Parties shall work to ensure that all investigators have access to other telemetered science and engineering data relevant to the calibration/validation of the respective investigations.
- 12.6 Copies of all publications and reports detailing the scientific results of the Juno mission investigations shall be provided to the PDS in a timely manner (within three months of publication), as well as the data modules on which they are based. The PDS shall, in turn, submit these publications and reports to NASA's National Space Science Data Center (NSSDC), where appropriate. Such publications and reports shall include a suitable acknowledgement of the services afforded by the contributions or the cooperation of each Party.

ARTICLE 13 - CUSTOMS CLEARANCE, IMMIGRATION, AND OWNERSHIP

- 13.1 In accordance with its laws and regulations, each Party shall facilitate free customs clearance and waiver of all applicable customs duties and taxes for goods necessary for the implementation of this MOU. In the event that any customs duties or taxes of any kind are nonetheless levied on such equipment and related goods, such customs duties or taxes shall be borne by the Party of the country levying such customs duties or taxes. The Parties' obligation to facilitate duty-free entry and exit of equipment and related goods is fully reciprocal.
- 13.2 Subject to its laws and regulations, each Party shall facilitate provision of the appropriate entry and residence documentation, if required, for the other Party's nationals who enter, exit, or reside within its territory in order to carry out the activities under this MOU.
- 13.3 Equipment provided by NASA pursuant to this MOU shall remain the property of NASA. Equipment provided by ASI pursuant to this MOU shall remain the property of ASI. Each Party agrees to return any of the other Party's equipment in its possession to the other Party at the conclusion of the project.

ARTICLE 14 - CONSULTATION AND DISPUTE RESOLUTION

- 14.1 The Parties agree to consult promptly with each other on all issues involving interpretation, implementation, or performance of the MOU. An issue concerning the interpretation, implementation, or performance of this MOU shall first be referred to the appropriate points of contact identified above for the Parties in Article 6. If they are unable to come to agreement on any issue, then the issue shall be referred to the NASA Associate Administrator for Science Mission Directorate and the ASI Technical Director and if unresolved at this level, to the NASA Administrator and the ASI President, or their designated representatives, for joint resolution.

ARTICLE 15 - MISHAP INVESTIGATION

- 15.1 In the case of a mishap or mission failure, the Parties agree to provide assistance to each other in the conduct of any investigation, bearing in mind, in particular, the provisions of Article 9 (Transfer of Goods and Technical Data). In the case of activities which might result in the death of or serious injury to persons, or substantial loss of or damage to property as a result of activities under this MOU, the Parties agree to establish a process for investigating each such mishap as part of their program/project implementation agreements.

ARTICLE 16 - AMENDMENTS

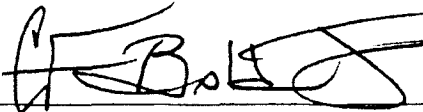

- 16.1 This MOU may be amended at any time by mutual written agreement.

ARTICLE 17 - ENTRY INTO FORCE, TERMINATION, AND CONTINUING OBLIGATIONS

- 17.1 This MOU shall enter into force upon signature by the Parties and the conclusion of an exchange of diplomatic notes between the Governments of the Parties incorporating its terms and conditions. This MOU shall remain in force until December 31, 2019, to permit the completion of the Juno mission and data analysis period. This MOU may be extended by mutual written agreement of the Parties, provided that the exchange of notes remains in force. The interim agreement of March 21, 2008, shall terminate upon entry into force of this MOU.

- 17.2 Either Party may terminate this MOU at any time by giving the other Party at least six months' written notice of its intent to terminate. The obligations of the Parties set forth in the Liability and Risk of Loss; Intellectual Property Rights; and Transfer of Goods and Technical Data provisions in this MOU shall continue to apply after the expiration or termination of this MOU. In the event of termination, each Party shall endeavor to minimize the negative impacts of any such termination on the other Party.

Juno Roles and Responsibilities – JIRAM and KaT Development

1.0 INTRODUCTION

1.1 Purpose and Scope

The purpose of this document is to clarify and document the specific roles and responsibilities for NASA/JPL, ASI/Thales Alenia and ASI/Selex Galileo with respect to the development of the Ka-Band Translator (KaT) and the Jovian Infrared Auroral Mapper (JIRAM) for use on Juno. This document is intended to be a primary reference document for the NASA/ASI Memorandum of Understanding.

1.2 Change Control

Change control for this document is specified in the project's Information, IT, and Configuration Management (IICM) Plan. This plan is approved by the project manager, and approved changes are recorded in the document change log.

1.3 Applicable and Reference Documents

"Applicable" documents levy requirements on the areas addressed in this document; "reference" documents are identified in the text of the document only to provide additional information to readers.

1.3.1 Applicable Documents

1. D-33995 Juno Project Information and Configuration Management Plan, Rev D, December 7, 2009.

1.3.2 Reference Documents

None

This document has been reviewed for export control and it does NOT contain controlled technical data.

Juno Roles and Responsibilities – JIRAM and KaT Development

2.0 ROLES AND RESPONSIBILITIES FOR JIRAM AND KAT

2.1 Overview

The following has been developed to clarify the various roles and responsibilities between NASA and ASI for development of the JIRAM instrument and the Ka-Band Translator. The primary parties involved in these developments are:

NASA

- The Jet Propulsion Laboratory Responsible for the Juno Mission

ASI

- Selex Galileo Responsible for the JIRAM development
- Thales Alenia Responsible for the KaT development

2.2 Roles and Responsibilities - JIRAM

Table 2-1 lists the ASI and NASA roles and responsibilities for the JIRAM development.

Table 2-1. JIRAM Development Roles and Responsibilities

Mission Phase	ASI	NASA/JPL (or JPL/ASI joint responsibility if so noted)
B	Provide JIRAM point of contact (IM and MAM Equivalent)	Supplies insight/oversight POC (support role) - Project Interface to ASI and their Contractor
B	Provide JIRAM technical lead to Payload System Engineering Team - Functions as primary technical interface to Juno Payload Engineering Team (JPET) and Lockheed Martin	Leads JPET
B	Instrument schedule and planning, including: - Staffing Plan and Organization Chart - Schedule - Spares Plan - Long Lead Procurements - Deliverables	Reviews/approves planning
B	Develop Plans - Instrument Implementation Plan - Mission Assurance Plan - Reliability Assurance Plan - Configuration Management Plan	Provides corresponding project plans. This includes, but is not limited to: - Payload System Implementation Plan - Safety and Mission Assurance Plan - Radiation Control Plan

This document has been reviewed for export control and it does NOT contain controlled technical data.

AMBASCIATA D'ITALIA
WASHINGTON, D. C.

NOTE VERBALE

Prot. n. 4168

The Embassy of Italy presents its compliments to the U.S. Department of State and has the honour to refer to its diplomatic note of June 29th 2011 concerning the terms and conditions whereby the National Aeronautics and Space Administration (NASA) and the Italian Space Agency (ASI) will undertake cooperation on the Juno mission to Jupiter.

The note is quoted as follows:

"I have the honour to refer to the recent discussions between representatives of the Government of the United States of America and the Government of the Italian Republic concerning the terms and conditions whereby the National Aeronautics and Space Administration (NASA) and the Italian Space Agency (ASI) will undertake cooperation on the Juno Mission to Jupiter.

On behalf of the Government of the United States of America, I propose that the cooperation between the two Governments on this project shall be in accordance with the terms and conditions set forth in the Memorandum of Understanding, signed June 22nd 2011 between NASA and ASI and the enclosed Juno Appendix.

If the foregoing proposal is acceptable to the Government of the Italian Republic, I further propose that this note, including the enclosed

U.S. Department of State
Washington, DC 20520

Memorandum of Understanding, and Your Excellency's affirmative reply shall constitute an agreement between the two Governments which shall enter into force on the date of Your Excellency's reply, and shall remain in force until the expiration or termination of the Memorandum of Understanding, in accordance with the terms thereof."

On behalf of the Government of the Italian Republic, the Embassy of Italy agrees that this note, together with the note from the U.S. Government dated June 29th 2011 shall constitute an agreement and shall be in accordance with the terms and conditions set forth in the Memorandum of Understanding, signed June 22nd 2011 between NASA and ASI.

The Embassy of Italy avails itself of this opportunity to renew to the U.S. Department of State the assurances of its highest consideration. *CH*

Washington DC, August 3, 2011
